

TERM 3 2021

ART

Welcome to Term 3! Get ready - it's going to be HUGE!

We have confirmed a date for our combined Anakie Primary and Community House Art Show. Keep Friday 27th August free for our Opening Night. There will be auctions, raffles, food and of course all the amazing artwork that the students have been creating through the year. Our 1st show in 2018 raised over \$1300 for the school and we are hoping to beat that this year!

This Term the students will be completing a range of art works using lots of different techniques and materials. Some of these include Prep/1 students working with clay to make birds, 5/6 students creating paper mache fish and 2/3/4 students making gumnut babies.

After the Art show, students will continue working on their portfolios, learning about Art theory, famous artists and continuing to create amazing artworks including our huge project Mosaic Wall.

P.E.

Welcome back! I hope everyone had a great holiday break with lots of exercise to keep fit and strong and healthy foods to fuel your bodies!

While we were not able to attend the YMCA as planned for our gymnastics unit last term, the students participated in gymnastics activities at school, where they practiced rolls, swings, safe landings, partner balances, poses and strength challenges.

We have again been given funding in Term 3 for a Sporting Schools program. Stay tuned to find out what we will be doing!

We also completed a 3 week netball unit, where students learnt the different passes used in netball, the positions, shooting technique, catching and played both modified and full games of netball. We were lucky enough to have netballer and SEDA student Alice assisting us for the term.

'Human Bop-It' has become one of the favourite warm-ups for PE sessions. It's a great one to try at home, particularly during Winter when the weather is too wet and cold for exercising outside. Its also a great way to break up screen time. Why not give it a go? Don't forget it is recommended Primary aged children do **at least 60 minutes every day** of moderate to vigorous physical activity that makes the heart beat faster.

In the last week of term we will be running our swimming program, which is part of the Health and Physical Education Curriculum and teaches our students essential water safety skills. Best of all it is also great FUN!
