

SUNSMART POLICY

PURPOSE

The purpose of this policy is to encourage behaviours at Anakie Primary School to minimise the risk of skin and eye damage and skin cancer.

This policy provides guidelines to:

- support staff and students to use a combination of sun protection measures when UV index levels are 3 or above (generally mid-August – end of April)
- ensure that there are outdoor environments that provide adequate shade for students and staff
- ensure students are encouraged and supported to develop independent sun protection skills to help them to be responsible for their own protection
- support our school's strategies to meet its duty of care and occupational health and safety obligations to minimise harmful UV exposure and associated harm for students and staff.

SCOPE

This policy applies to all school activities, including camps and excursions. It is applicable to all students and staff.

POLICY

Excessive exposure to the sun's ultraviolet (UV) radiation can cause health problems including sunburn, damage to skin and eyes, and skin cancer. UV damage accumulated during childhood and adolescence is strongly associated with an increased risk of skin cancer in later life.

UV radiation:

- cannot be seen or felt
- can be reflected off surfaces such as buildings, asphalt, concrete, water, sand and snow
- can pass through light clouds
- varies in intensity across the year (highest in Victoria from mid-August – end of April)
- peaks during school hours

Sun safety is a shared responsibility and staff, parents and students are encouraged to implement a combination of sun protection measures whenever UV levels reach 3 and above (typically from mid-August to the end of April in Victoria). Information about the daily local sun protection times is available via a free SunSmart app, or at sunsmart.com.au or bom.gov.au. The sun protection times are a forecast from the Bureau of Meteorology for the time of day UV levels are forecast to reach 3 or higher. **At these levels, sun protection is recommended for all skin types.**

Anakie Primary School has the following measures in place to help reduce the risk of excessive UV sun exposure for staff and students.

Shade

Anakie Primary School will provide sufficient options for shelter and trees to provide shade on school grounds, particularly in places such as:

- the sheltered deck area
- popular play areas such as the playground equipment and sand pit

The availability of shade is considered when planning all outdoor activities.

Students are encouraged to use available areas of shade when outside.

When building works or grounds maintenance is conducted at Anakie Primary School that may impact on the level of shading available to staff and students, a review of the shaded areas available will be conducted and further shading installed as appropriate.

Sun protective uniform/clothing

Anakie Primary School recommends from mid-August to the end of April, and whenever UV levels reach 3 and above, students come to school wearing sun-protective clothing such as:

- shirts with a collar and/or high necklines
- tops with elbow length or long sleeves
- longer style shorts and skirts

Anakie Primary School's school uniform and dress code includes sun-protective clothing, including:

- loose, cool, closely-woven fabric
- shirts with a collar and/or high necklines
- tops with elbow length or long sleeves
- longer style shorts and skirts
- an approved sunsmart hat when engaged in outdoor play

From mid-August to the end of April, all students and staff **must** wear a sun protective hat that shades the face, neck and ears for all outdoor activities. Hats may also be worn for all outdoor activities outside of the August to April time period, by parent or student choice. Students who are not wearing appropriate protective clothing or a hat will be asked to play in the shade or in a suitable area protected from the sun. Peak caps and visors are not considered a suitable alternative.

Sunscreen

Anakie Primary School encourages all staff and students to apply SPF30 (or higher) broad-spectrum, water-resistant sunscreen daily from mid-August to the end of April and whenever UV levels reach 3 and above. Sunscreen should be applied at least 20 minutes before going outdoors, and reapplied every two hours or more frequently if sweating or swimming, according to [manufacturer's instructions](#).

Staff and families should role model SunSmart behaviour and are encouraged to apply SPF 30 (or higher) broad-spectrum, water-resistant sunscreen when outside. Staff are also expected to wear an approved sunsmart hat when outdoors.

Sunglasses

Where practical Anakie Primary School encourages students and staff engaged in outdoor activities to wear close-fitting, wrap-around sunglasses that meet the Australian Standard 1067 (Sunglasses: Category 2, 3 or 4) and cover as much of the eye area as possible.

Curriculum

Students at our school are encouraged to make healthy choices, and are supported to understand the benefits and risks of sun exposure. Anakie Primary School will address sun and UV safety education as part of the Health and Physical Education Program for all year levels.

Staff are encouraged to access resources, tools, and professional learning to enhance their knowledge and capacity to promote sun smart behaviour across the school community. Resources can be sourced at <https://www.sunsmart.com.au/communities/early-childhood-schools/resources-schools-early-childhood/primary-school-resources>

Engaging students, staff and families

SunSmart behaviour is regularly reinforced and promoted to the whole school community through the newsletters, Compass platform, school assemblies, student and teacher activities and at student enrolment/new staff orientation. Families and staff are provided with information, ideas and practical strategies to support UV safety at school and at home.
